Job vacancy (Chiffre: MEDI-15465)

Medical information scientist as database developer, IVa
(End of employment: 31.08.2019)

Education: university degree in health informatics, computer science, related fields or equivalent education, experience in the development, set-up and maintenance of database and client-server systems, experience with script and programming languages, basic knowledge of requirements and maintenance of biobank IT systems.

Experience & skills: knowledge of sample storage and processing in biobanking, experience with patients data (data protection and secrecy), medical knowledge, teaching and training experience, responsible and independent way of working, communication and teamwork skills, IT project management experience.

Activities & tasks: setup and administration of an IT biobanking infrastructure at the Medical University of Innsbruck in accordance with the project management and the participating institutions, training of personnel involved in biobanking.

The monthly minimum salary: € 2'457.90 gross (14 times a year). Benefits or overpayment is possible, depending on qualifications and job experience.

Written applications quoting the Chiffre at the envelope should be submitted to the Human Resources Department of the Medical University of Innsbruck, Bürgerstraße 2 (3. Stock), 6020 Innsbruck, AUSTRIA, up to the 10th February 2016. MUI does not reimburse any travel or subsistence expenses. Interviews at the institutes and clinics are planned. The application forms (available from http://www.i-med.ac.at/personal/formulare/alle_dienstnehmer/) have to be submitted together with the written application. The Medical University of Innsbruck pursues a non-discriminatory employment policy and values equal opportunities, as well as diversity. The University lays special emphasis on increasing the number of women in senior and in academic positions. Given equal qualifications, preference will be given to female applicants. This is a repetition of the vacancy.
