Challenges of bringing NGS to patients

Prof Kurt Zatloukal, Coordinator of the EU-funded Pre-Commercial Procurement project, INSTAND-NGS4P, talks to Siliconrepublic.com, a leading online publication in Europe focussing on vital issues impacting science, technology, engineering and maths.

The INSTAND-NGS4P project aims to provide better access to next-generation sequencing for cancer patients. Prof. Zatloukal highlights in this interview the challenges facing the scientific community with regard to regulatory requirements and the need to demonstrate the health economic benefit of NGS for routine healthcare and ultimately the patient.
