

Award for the project "Development of a public research infrastructure database for Austria"

June 2021

The project "Development of a public research infrastructure database for Austria" - received the Austrian Administration Award 2021. BBMRI.at and BBMRI.at partners are registered research institution therein.

The database serves as an information platform and enables access to and use of infrastructure capacities in Austria. It can be used to find or offer infrastructures for new cooperation projects. The target groups are researchers as well as the management of research infrastructure, funding institutions, politics and administration.

Austria is one of only very few countries which has such a public research infrastructure database that makes the variety of research infrastructures and their opportunities for cooperation and use in science, research, business and industry transparent and publicly visible.

Search the "[Public Research Infrastructure Database for Austria](#)">>

The screenshot shows the BBMRI.at website interface. At the top left is the logo of the Bundesministerium Bildung, Wissenschaft und Forschung. At the top right is the 'Forschungsinfrastruktur' logo with navigation links: Start, Suche, Galerie, Über, FAQs & Downloads. The main header reads 'BBMRI.at – Österreichische Biobanken Forschungsinfrastruktur'. Below this is a navigation bar with a page number '1/1976' and social media icons. The main content area features the BBMRI.at logo and the text 'Biobanking and BioMolecular resources Research Infrastructure Austria'. To the right, under the heading 'BBMRI.at Österreichische Biobanken Forschungsinfrastruktur', there is a 'Kurzbeschreibung' section. This section includes a 'Care Facilities (CF)' link, a description of the infrastructure's purpose, and a list of partner institutions: Medical University of Graz with Biobank Graz, Medical University of Vienna with MedUni Wien Biobank, Medical University of Innsbruck with Biobank Innsbruck, Johannes Kepler University (Linz) with Biobank Linz (under development), Paracelsus Medizinische Universität (Salzburg), University of Vienna, and Alpen Adria University Klagenfurt. Below the partners list is the 'Ansprechperson' (Contact person) section, listing Cornelia Stumptner. The 'Research Services' section lists: Access to human/animal samples and related data (diseased, healthy), Prospective collection/storage of biological (human, animal) samples and associated data, Preparation and processing of biological samples, and Central contact point for sample/data/collaboration inquiries to all Austrian & >600 European biobanks (http://bbmri.at/catalog).
