

Documentary movie

„Corona – auf der Suche nach der Wahrheit“

May 2021

BBMRI.at National Node Director, Kurt Zatloukal, and his team from the BSL-3 laboratory at Med Uni Graz, contributed to the documentary movie about Corona.

The movie produced by Moviemedia Film + Medienproduktion is broadcasted on Servus TV in Austria and Germany.

Corona has been determining and influencing all of our lives since March 2020.

For individuals and the public it is often difficult to obtain information that is not influenced for example by politics and the media. That is why a film maker team and Prof. Dr. Dr. Martin Haditsch, a recognized expert and specialist in hygiene and microbiology, virology and infection epidemiology, flew around the world to get the opinion of other independent scientists and doctors. BBMRI.at partner Med Uni Graz with its BSL-3 Laboratory at the Institute of Pathology was part of it.

This big documentary with part 1 starts in May, the shooting of part 2 will start soon afterward.
