Course "How to Build a Biobank biobank - Learning by Doing"

BBMRI.at partner Med Uni Graz organizes this 2-day biobanking course

This course is set up to:

- Deliver theoretical, operating and hands-on comprehensive knowledge essential to enable the activities of emerging and established biobanks
- Transfer best practice principles for biobank personnel, investigators, clinicians and interested personnel
- Encourage exchange of knowledge and skills across different biobanking activities from biospecimen preservation and storage to science and research
- Enhance research quality in and public awareness of biobanks

Target group: All who are involved in setting up a biobank, who want to cooperate with a biobank or research institute, who face the challenges of a growing biobank or try to overcome the challenges of maintaining a large biobank.

International Biobanking and Education

How to Build a Biobank – Learning by Doing

This interactive 2-day-course has been designed for all those who are involved in setting up a new biobank, who look to collaborate with a biobank or research institute, who face the challenges of a growing biobank or who try to overcome the challenges of maintaining a large biobank. The format of this course is a mixture of presentations and discussion sessions allowing participants to learn from the expert advice and the specific experience of their peers. Bring your questions with you for discussion!

This course is set up to:

- Deliver the theoretical, operating and hands-on comprehensive knowledge essential to enable the activities of emerging and established biobanks.
- Transfer best practices for biobank personnel, investigators, clinicians and interested personnel.
- Encourage exchange of knowledge and skills across different biobanking activities from biospecimen preservation and storage to science and research.
- Enhance research quality in and public awareness of biobanks.

Insights:

- Definitions and types of biobanking, what and how
- Governance types and possibilities
- Biobanking ethics, privacy, informed consent and data security
- Design and services of a biobank
