

**LAST MINUTE REGISTRATION for the
 Hybrid Session on Biobanking at the United Nations General Assembly Science Summit UNGA77
 27 Sep 2022**

Biobanking is a session topic at the Science Summit at the United Nations General Assembly (UNGA77). Also this year, BBMRI.at contributes to this international hybrid event.

Numerous renowned speakers from various countries talk about biobanking strategies, challenges, relevance of biobanks, ethical, legal and sustainability issues, and best practice examples.

Attend the presentation by BBMRI.at Director

Kurt ZATLOUKAL
 "Biobanking and global health challenges"
 When: **27 Sep 2022 - 20:00 CEST**

Free registration > <https://sched.co/14WFG>

Program>

About the UNGA77:

The UNGA77 Science Summit around the 77th United (SSUNGA77) on 13-30 September 2022 is a hybrid event with some sessions being held in New York and others online.

The role and contribution of science to attaining the United Nations Sustainable Development Goals (SDGs) will be the central theme of this conference.

The objective is to develop and launch science collaboration to demonstrate global science mechanisms and activities to support the attainment of the UN SDGs, Agenda 2030 and Local 2030.
