

Save the date: 20 May 2022

for the Long Night of Research | Lange Nacht der Forschung

April 2022

The Long Night of Research is the largest event for science and research in the German-speaking world. Every 2 years it attracts young and old and brings science and innovative findings closer to the public.

The Long Night of Research has tradition – and so has the participation of BBMRI.at, Biobank Graz and BBMRI-ERIC, which once again participate and make biobanking tangible to people by offering hands-on sessions for biobank sample handling and guided biobank tours.

So keep Friday 20 May 2022 reserved and visit BBMRI at ZWT and Med Campus, Neue Stiftingtalstrasse 2, 8010 Graz between 17:00 and 23:00.
