

## APPLY NOW!

### Research funding opportunity & Europ. Molecular Tumour Board Network participation - via EU project canSERV

The EU project canSER offers cutting edge, interdisciplinary and customised oncology services across the entire cancer continuum. Several BBMRI.at members including their biobanks are involved in this project offering access to services.

In calls, these services are provided for free to researchers in the cancer field. The first [Call for Service Provision on 'Advancing Personalised Oncology'](#) has just been launched. The aim of this call is to accelerate knowledge gain in personalised oncology with specific emphasis on multi-level data-based treatment guidance linked to [Molecular Tumour Boards \(pdf\)](#).

#### How it works

- In brief, inform yourself about the [call topics and requirements here](#)>. ([open pdf](#))
- Send an application with a description of your research project you are interested of receive access to services offered by canSERV and listed in the canSERV catalog.
- Submitted applications will be evaluated by an independent international panel and the Scientific Management Board.
- Accepted projects will receive free-of-charge access to services offered by canSERV.
